

EDBERTO TOSOY

Software Engineer
Cloud • DevOps • Platform Engineering

edberto.tosoy@gmail.com | 0960-822-3122 | tosoyed-portfolio.vercel.app | github.com/edtosoy

PROFESSIONAL SUMMARY

Software Engineer with professional experience developing production banking applications using React, TypeScript, REST APIs, and automated testing. Experienced collaborating across engineering teams to build reliable software, with a strong foundation in Linux, cloud technologies, containerization, and automation. Hands-on experience with Docker, Kubernetes, Terraform, AWS, CI/CD, Prometheus, and Grafana through self-directed engineering projects, with a long-term focus on Cloud, DevOps, and Platform Engineering.

WORK EXPERIENCE

Software Engineer — Metrobank (via 98labs Inc.)

Feb 2021 – Jul 2022

- Developed and maintained internal banking applications used by bank tellers and administrative staff in a live production environment.
- Built transaction workflow features supporting cash deposits, cash withdrawals, and encashment transactions.
- Collaborated with backend engineers across multiple teams to integrate frontend applications with REST APIs.
- Wrote and maintained Cypress end-to-end tests for critical banking workflows.
- Developed reusable UI components with React, TypeScript, Redux, Ant Design, React Hook Form, and SCSS.

Tech Stack: React, TypeScript, Ant Design, React Hook Form, Redux, SCSS, REST APIs, Cypress

PROJECTS

Professional Development

Jul 2025 – Present

- Built multiple cloud and DevOps projects using Docker, Kubernetes, Terraform, AWS, Prometheus, Grafana, and GitHub Actions to strengthen practical skills in containerization, Infrastructure as Code, Observability, and CI/CD.
- Developed full-stack applications using Angular, NestJS, Nx Monorepos, RabbitMQ, TypeScript, PostgreSQL, and Drizzle ORM, exploring microservices and event-driven architectures.
- Maintain and use a fully declarative, reproducible NixOS development environment for daily software development, a keyboard-driven workflow with Neovim and Qutebrowser.
- Built AI-powered applications through API integrations with multiple AI providers, including Claude, Google AI, Sonar, and Amazon Q.
- Explored workflow automation with n8n and expanded backend development skills through projects built with Go.

Tech Stack: AWS, Terraform, Docker, Kubernetes, Prometheus, Grafana, Angular, NestJS, Nx, RabbitMQ, TypeScript, PostgreSQL, Drizzle ORM, Go

TECHNICAL SKILLS

Cloud & DevOps:

Docker
Kubernetes
Terraform
AWS
GitHub Actions
Prometheus
Grafana

Operating Systems & Tools:

Linux
Git
Neovim

Programming Languages:

TypeScript
Go
Python

Backend:

Node.js
NestJS
RabbitMQ

Databases:

PostgreSQL
MongoDB
Drizzle ORM

Frontend:

Angular
React

EDUCATION

FEU Roosevelt Marikina

Bachelor of Science in Information Technology

June 2025
